Technology for intelligent buildings

# OPENapp.

Easy, economical, revolutionary.

## OPENapp makes it easy for you.

The vision of developing a controller that combines intelligent technology with ease of use has become a reality.

For the highly efficient automation of technical building equipment, DEOS AG has developed a unique product: **OPENapp**.

**OPENapp** is a standard controller for heating, ventilation and air-conditioning that simplifies the commissioning of MCR systems like no other of its kind.

## OPENapp redefines building automation.

Our corporate philosophy strives to incorporate ease of use with highly qualified technical expertise.

Our software application **OPENapp** combines intuitive use with the reliability of a standard controller. Thanks to its graphic configuration, programming skills are no longer necessary.

This makes **OPENapp** the ideal and individual solution for small and medium-sized projects. During commissioning, operation and maintenance, you benefit from the following advantages:

- High flexibility
- Fully graphic configuration and central operation on the OPEN 500/600 EMS
- Powerful web server allows remote monitoring
- Reduced commissioning time
- Parameters are saved upon project completion
- Various security access levels
- Logic functions for special requirements

## OPENapp for your project.

The standard controller **OPENapp** is available in two versions:

### OPENapp HVAC

The possibility to integrate up to 12 installations, which can be individually selected and arranged, covers many common controls in building technology. Also individual plant elements can be added or removed during runtime.

The configurable systems (max. 12) and freely configurable systems include:

- Heating or feeder circuits
- Boiler and twin boiler systems
- Water heating systems
- District heating
- Ventilation systems
- Refrigerating systems
- Free time switches

### OPENapp HVAC Package Unit

Package units or rooftop units (RTU) are compact cooling and heating units in one packet. These units are installed on the floor or the roof outside buildings.

The configurable systems (max. 8) and freely configurable systems include:

- HVAC package units / rooftop units
- Fans
