

**Rheine, 3rd July, 2017**

## **Press release**

### **Industry Customer Confidence Prize goes to DEOS AG! - in the building automation systems category**

**On the occasion of the 50th anniversary of cci Dialog GmbH, the "Customer Confidence Prize of the LüKK (German refrigeration, ventilation and air-conditioning sector)" was awarded to DEOS AG for the first time at a ceremony in Karlsruhe. 25,600 votes decided which of the seventy manufacturers of the ventilation, air-conditioning and refrigeration industry were honoured with a prize in the individual categories.**

With third place in the "Building automation systems" category, partners, planners and users expressed their confidence in the products, solutions and services of DEOS AG. This meant that the company prevailed against other large representatives of the industry in the matters of dependability and recommendation. The evaluation criteria taken into consideration included technology, conceptual consultation, after-sales service and recommendability.

"We now enjoy a very high level of proven trust from our partners. That's a great feeling." said Stefan Plüth, DEOS Executive Board Member, who accepted the Customer Confidence Prize on behalf of all DEOS employees.

This award and the corresponding vote of confidence are especially gratifying on the 50th company anniversary. What started as a regionally-based company in 1967 has become internationally-oriented DEOS AG (**D**igital **E**nergy **O**ptimisation **S**ystems) with more than 200 employees in 2017. For more than 50 years, the DEOS employees have been enthusiastically finding solutions for modern building automation.

#### **About cci Dialog GmbH**

cci Dialog GmbH is a specialist information provider in the ventilation, air-conditioning and refrigeration industry with its head office in Karlsruhe. As an important trade magazine, it provides information on trends and products. On the occasion of the 50th anniversary of its existence, cci Dialog GmbH launched the Customer Confidence Prize of the ventilation, air-conditioning and refrigeration industry.
