

## Georg Utz GmbH, Germany

The German subsidiary of this international manufacturer that produces containers for storage and freight transport, including workpiece holders and pallets made of recyclable plastic uses OPENenergy to monitor its energy consumption.

One hundred meters record production, storage and staff facilities consumption and, together with the updated data from manual reading, create the basis for various reports. The Dashboard monitors current measured values and consumption, including selected meters.

Optimization potential can be identified by analyzing the collected data. This makes OPENenergy helpful for actively managing energy.
