

Theatre Neue Flora, Germany

The two architects Uwe Köhnholdt and Konstantin Kleffel designed and constructed the theatre Neue Flora in Hamburg in the years 1988/90. Counting a number of 1965 places it is one of the largest theatres in Germany.

In the context of the modernisation of the audience area and the stage room, the operator decided to install the energy efficient building automation system delivered by DEOS AG. Two powerful OPEN 800 EMS controllers are integrated to control the room climate. The freely programmable OPENweb is configured upon the operator's needs.
